

Call for Innovation (CFI)

Mission Planning Software

Requested Innovation

EDGE Innovation Network is seeking information on mission planning software suites that could apply to multiple domains: sea, air, space and land.

Requested software tools may include but not limited to:

- Automated task planning based on external events and manual modification thereof
- Manual task planning
- Ability to use plug-in & user-defined algorithms
- Schedule deconfliction based on resource usage and activity priority
- Open modular API to integrate external sensor data
- Customizable reporting and resource reports
- Authorized user access via web based tool (optional)

Timeline and Instructions for Responses

Please provide your innovative solutions in a white paper or capability sheet(s) to edgeinnovation@gd-ms.com by close of business October 7, 2016.

For Assistance with this CFI

Please contact [Sheila Lucas](mailto:Sheila.Lucas@edgeinnovation.com) by email.

Learn More About the EDGE Innovation Network

The EDGE® Innovation Network is a revolutionary model where industry, academia, and non-profit organizations, along with government entities, collaborate in an open community environment to rapidly deliver new technologies and innovative capabilities to military, government agencies, law enforcement personnel, first responders and end users of technology worldwide.

Our mission: Create and maintain an open environment where [members](#) and customers can characterize, nurture, develop and deliver current and emerging technologies and capabilities to equip a more mobile, better connected and better informed end-user. [Read More](#)
